It is the general policy of the OMH that, statewide, equal access to voluntary-operated residential program admissions be provided to individuals discharged from State hospitals as well as those referred through community referrals. The CONTRACTOR and the OMH State-operated Psychiatric Center have utilized good faith efforts towards entering into Affiliation Agreements, stipulating policy and procedures essential to the accomplishment of the residential program admission goals, and shall continue to utilize such efforts to revise and refine such existing agreements.

Provider agrees to participate in the Single Point of Access established by the county(ies) in which the provider operates residential programs, according to terms established by such county(ies).

- The single point of access process is designed to assist counties in managing their most intensive mental health services, primarily housing, assertive community treatment and case management, to facilitate better coordination of services and to provide opportunities for the county to add wraparound services in support of more difficult or tenuous residential placements.
- The single point of access process for housing is intended to be a collaborative one in which the county and service providers share responsibility for ensuring that individuals with the greatest need are given priority access to the most appropriate available placements.
- Providers have the right to make an admissions decision on each referral, based on the clinical appropriateness of their service for the individual and an assessment of current conditions that might make the placement unsuitable. In turn, counties have the right to monitor admissions by provider, and to take action should a provider show a pattern of inappropriate admissions decisions. Inappropriate decisions would include rejection of entire categories of individuals, and determinations based solely on an individual's history without consideration of current clinical condition and additional supports that the county can make available.
